Special Events, Nuclear Incidents, Hazardous Materials

This electronic book on CD-ROM provides a unique and comprehensive collection of major Federal government documents on disaster management and terrorism response:

DEPARTMENT OF HOMELAND SECURITY NATIONAL RESPONSE PLAN - The NRP establishes a comprehensive, national, all-hazards approach to domestic incident management across a spectrum of activities. It is predicated on the National Incident Management System (NIMS). The NIMS is a nationwide template enabling government and nongovernmental responders to respond to all domestic incidents. The plan incorporates best practices and procedures from incident management disciplines - homeland security, emergency management, law enforcement, firefighting, public works, public health, responder and recovery worker health and safety, emergency medical services, and the private sector - and integrates them into a unified structure. It forms the basis of how the federal government coordinates with state, local, and tribal governments and the private sector during incidents. It establishes protocols to help: Save lives and protect the health and safety of the public, responders, and recovery workers; Ensure security of the homeland; Prevent an imminent incident, including acts of terrorism, from occurring; Protect and restore critical infrastructure and key resources; Conduct law enforcement investigations to resolve the incident, apprehend the perpetrators, and collect and preserve evidence for prosecution and/or attribution; Protect property and mitigate damages and impacts to individuals, communities, and the environment; and facilitate recovery of individuals, families, businesses, governments, and the environment.

FEDERAL EMERGENCY MANAGEMENT AGENCY
FEMA TRAINING COURSE MANUALS
These vital Federal Emergency Management Agency

(FEMA) Training Course Manuals cover Disaster Management and Terrorism Response, Special Events, Nuclear Incidents, Hazardous Materials - and all files are fully indexed and searchable. These are the complete manuals made available by FEMA as part of the Emergency Management Institute Independent Study program, described this way by FEMA: Within the Department of Homeland Security, the Federal Emergency Management Agency, United States Fire Administration, operates the Emergency Management Institute (EMI). EMI produces independent study courses to train the general public as well as specific target audiences. The EMI Independent Study program consists of self-paced courses designed for people who have emergency management responsibilities and the general public. .and college credit can be obtained through a for-fee service. Each Independent Study Course includes lessons with practice exercises and a final examination. Students who score 75 percent or better are issued a certificate of achievement from EMI. Course completion times vary from two to fourteen hours, depending on the course and the students background. Official enrollment in the courses, scoring of final exams, issuance of certificates, and maintenance of student records is limited to United States Citizens with a US deliverable postal address including APO and FPO addresses. This comprehensive CD-ROM is packed with nearly 8,000 pages reproduced using Adobe Acrobat PDF software - allowing direct viewing on Windows and Macintosh systems. The Acrobat cataloging technology adds enormous value and uncommon functionality to this impressive collection of government documents and material. Our news and educational CD-ROM and DVD-ROM discs are privately compiled collections of official public domain U.S. government files and documents - they are not produced by the federal government. They are designed to provide a convenient

user-friendly reference work, utilizing the benefits of the Adobe Acrobat format to uniformly present thousands of pages that can be rapidly reviewed, searched by finding specific words, or printed without untold hours of tedious research and downloading. Vast archives of important public domain governm
